Attn: Intercontinental Restoration Loss Team

My McDonald's restaurant located at 1642 Pitkin Ave, Brooklyn, NY, suffered extensive fire damage to the kitchen area while the remaining areas sustained smoke and water damage. This restaurant is in an older building, making the restoration more complicated. The entire restoration project was handled by intercontinental Restoration. Intercontinental Restorations project manager moved into an apartment near the project, making him available 24 hours a day.

Intercontinental Restoration handled all phases of the project—negotiating with the insurance company, McDonald's vendors, subcontractors, the building owner, architects, and the city's permit department and inspectors. Your dedication to meeting our recovery needs and getting my business up and running as quickly as possible was invaluable.

Based on the thorough project management, quick response and personal assistance we experienced from Intercontinental Restoration, I would highly recommend your organization for any size restoration project.

Joe Mbanefo
